EQUIPMENT RENTAL

Projector and Screen Rental

Your presentation without the hassle, everything you need delivered, set up, and collected. Before your guests arrive, we will connect your laptop to our projector, and do a complete test.

As we use an "ultra short throw" projector, the projector is positioned right next to the screen, taking up very little space. When you are ready to show your slideshow, there's no need to clear a space nor move equipment around. Just start your slideshow instantly on demand, at whatever point you want during your event!

But why stop in the middle of your event to show your slideshow? As we set it up for you at the start of your event on the side, we can instead set up your slideshow to run all evening on "autoloop".

- Rental for one evening of ultra short throw projector + screen
- Delivery + set up + connecting to your device + pick up   *300nis*
- Security deposit required

Projector, Screen and Device Rental

In addition to the above, you can also rent a laptop or tablet. Send us your slideshow in advance, and we can have it already set up on the device, making set up even smoother for you on the day of your event.

- Rental for one evening of ultra short throw projector + screen + laptop
  or tablet
- Delivery + set up + connecting to our device + pick up   *400nis*
- Your slideshow pre-installed on the device
- Security deposit required

_____

Prices for rental <u>and</u> the upgrades **(on the next page)**, are for the Greater Bet Shemesh area. 200nis supplement for Jerusalem, Modiin and Carmei Gat. Other locations on application.

Security deposit for rental only package is 1,000nis, or 1,500nis with laptop/tablet. It can be made with cheque or cash, which is returned to you after the event. Otherwise you can make a bank transfer in advance, and we will refund within 2 business days.

Big Screen Zoom Experience and *Real-Time Memory Wall* need internet access. The venue will either need to have WiFi, or good mobile phone coverage on at least one network. A site survey may be needed for some venues we are not familiar with.

UPGRADES

Big Screen Zoom Experience

When a Baal Simcha brings a laptop to a simcha connecting it to the internet to run Zoom for remote friends and family, it's one more hassle, and often a poor experience. Many guests don't realise there's a Zoom laptop to go to. Local and remote guests can have trouble hearing and seeing and remote guests can have periods not interacting with anyone.

By projecting your Zoom up on the big screen, everyone in the hall is aware of it! We send a representative to manage the equipment, help guests and keep the remote guests informed. Note our equipment takes up very little space!

Optionally you can show your slideshow on the big screen too.

- Delivery, set up and collection of all equipment
- Helping guests interact with remote guests
- Encouraging guests to join in
- Commentary for remote guests   *900nis*
- Your presentation pre-installed on the device (if applicable)
- Switching between Zoom and your presentation (if applicable)
- Pausing Zoom eg for speeches and tefilla

Real-Time Memory Wall

Guests at your simcha take lots of photos. Your guests send us those photos via a very simple web interface (no app required!), and we project them in real-time on to a big screen. You can view all the photos instantly after your event. We send a representative to manage the equipment and help guests.

- Delivery, set up and collection of all equipment
- Real-time slide show of photos on the big screen
- Set up and "branding" of Memory Wall web page beforehand
- Sharing of unique link before your event that you can email or WhatsApp to your guests in advance
- Printing and putting out framed branded instructions and QR code to display at your event   *1,400nis*
- Moderation of photo uploads during the event to prevent too many duplicates (photo-spamming) and ensure appropriateness
- On-site technical assistance for guests
- Album available for instant download after your event, and for 30 days afterwards
